

SKY RTU

Description

SKY RTU is a ready-to-use Isinglass solution designed for direct addition to both cask-conditioned and brewery-conditioned beers to aid in yeast removal.

Benefits

- Quickly removes yeast from beer
- Helps reduce protein and lipid levels
- A traditional, natural fining agent
- Improves filtration efficiency
- Contributes to enhanced foam stability
- Suitable for both cask-conditioned and brewery-conditioned beers

Application and Dosage Rates

REFER TO THE SAFETY DATA SHEET BEFORE USING THIS PRODUCT.

REMIX BEFORE USE. (PRODUCT MAY SEPARATE DURING STORAGE).

Cask Conditioned beer

Add the appropriate quantity of ready for use Isinglass into the cask before filling. With cask conditioned beers, the best clarity is always achieved by also using SKY AUX auxiliary finings in conjunction with SKY RTU.

Brewery Conditioned beer

For tank addition, Isinglass solution is best added during the transfer of beer from Fermentation Vessel to Maturation Vessel / Conditioning Tank. For best results, proportional metered dosing should be employed. Better clarity is always achieved if beer and isinglass are mixed properly.

PRODUCT CODE

7112

PACKAGING

25 Litres 200 litres 1000 litres

STORAGE

Store in original container.

Recommended storage temperature 5-10 Degrees C.

Store away from direct sunlight.

Do not allow to freeze.

SHELF LIFE

Use within 8 weeks from date of the date of manufacture.

Rates of use

Typical dosage rates are in the range of 3 – 4 pints ready to use isinglass per barrel. To ascertain the correct dosing rate for your beer please carry out a finings optimisation trial. The perfect amount is dependent upon the beer recipe, yeast cell count and yeast type. Adding too much Isinglass will result in fluffy bottoms, beer loses and poor clarity. For information on conducting a finings trial please contact a member of our technical team

Allergens

SKY RTU contains Sulphides and Sulphites.
