

AQUA TREAT

Description

A food grade acid added to the brewing liquor to reduce alkalinity and to add beneficial ions to the brewing liquor.

Benefits

Adds sulphate ions to the liquor.
Ensures optimal pH through the whole brewing process.
Helps to deliver optimal run off in mash tun clarity and stability.
Optimises filter performance, extract yield and fermentability.

Application and Dosage Rates

ENSURE THAT THIS PRODUCT DOES NOT COME INTO CONTACT WITH METALS IN THE BREWHOUSE AS IT WILL CAUSE CORROSION AND RUSTING.

REFER TO THE SAFETY DATA SHEET BEFORE USING THIS PRODUCT.

BREWERY USAGE

It is always best to add AQUA TREAT to the cold liquor tank, this will help to prevent the build up of scale on the heating elements. It is important to allow sufficient time for the AQUA TREAT to react with the carbonates in the water.

AQUA TREAT can also be used to fine tune the pH though the brewing process, however before doing this it is advisable to do lab trials to ascertain the correct dosage.

5ml AQUA TREAT per hl water reduces the Alkalinity by 22 mg/L (ppm) and increases Sulphate levels by 21 mg/l (ppm).

PRODUCT CODE

3207

PACKAGING

25 Litres

STORAGE

Store in original container.

Keep away from Chlorines.

Recommended storage
temperature 10-20 Degrees C.

Store away from direct sunlight.

Do not allow to freeze.

SHELF LIFE

Use within 12 months from the
date of manufacture.

REVISION NUMBER 001
