

SULPHURIC ACID 50%

Description

50% Sulphuric Acid. For use in the pH correction of Brewery effluent.

Benefits

Cheapest option for treating Brewery effluent. Because Sulphuric acid has 2 x hydrogen ions, it has double the neutralising power of Hydrochloric acid.

Application and Dosage Rates

REFER TO THE SAFETY DATA SHEET BEFORE USING THIS PRODUCT.

BREWERY USAGE

Dose into the effluent stream of effluent buffer tank to neutralise high pH effluent.

PRODUCT CODE

1195 / 50

PACKAGING

25 Litres 200 Litres 1000 Litres

STORAGE

Store in original container.

Keep away from Chlorines and Alkalines.

Recommended storage temperature 10-15 Degrees C.

SHELF LIFE

Use within 60 months from the date of manufacture.
